

Mission: Acid Rain, Win CD

Travel through time to learn about acid rain damage to Northern Ontario's Killarney Lakes.

Product Features

Intuitive Navigation	High Level of Interactivity
Latest Scientific Data	Online Library
Glossary	Quizzes

Grade Level

High School

Detailed Product Information:

Take an interactive journey to the Killarney region of Northern Ontario, an area in which lakes have shown striking variability in response to acid pollution. Travel through time, and get up close to many of the animals that live in these lakes, as you help discover how acid rain affects biodiversity. Measure pH, crack rocks, and sample life as you learn why lakes vary in their sensitivity to acid rain, and find out what you can do to reduce pollution on this planet.

Mission: Acid Rain is packed with up-to-date scientific data, animation, interactivity, and dynamic graphics to encourage investigative learning. This CD-ROM encourages students to explore complex environmental issues and illustrates the interrelationships of science, technology, and society.

Some of the investigations include: water PH; acid rain; emissions control; direct and indirect effects on food webs; and determining how quickly a lake recovers from acid rain damage.

System Requirements:

Windows:

95/98/NT

16 MB RAM

16-bit sound card

4x CD-ROM drive.
