

# DryLabPlus Earthworm

*Study the external and internal anatomy of the earthworm right down to the microscopic level.*

## *Product Features*

Stunning Full Screen Photographs at High-Resolution	Complete Interactive Dissection Video
Anatomical Structures identified by Text, Sound, and Outlines	Movie Clips of Special Anatomical Features or Techniques
Electronic Teacher and Student Notepads	Test Questions, Music, Pronunciations, and Text
Teacher Editable Content	

## *Grade Level*

**High School • College • University**

## *Detailed Product Information:*

Study both the external and internal anatomy of the earthworm from a general 'overview' right down to microscopic detail of each system. Watch videos of difficult to see concepts like the movement of the lateral setae; the peristaltic movement of the worm or the surprisingly common invasion of a circulatory or excretory parasite! Participate in an interactive dissection. The Earthworm includes over 90 images, slides, diagrams and more than 500 questions!

Navigate the program using a drop-down menu to choose various 'views' of a specimen. Anatomical features are highlighted and identified using a mouse. Each picture is accompanied by Teacher's Notes, providing important information about each 'view'. Full-motion videos provide detailed insight into often difficult to show concepts or topics. Test your knowledge as identify objects and answer random questions generated by the computer.

Once you have mastered the anatomical features, move on to performing the dissection. You must choose the correct dissection instrument for each step and must perform all of the steps necessary in proper sequence. On-line help and a full-motion video (with narration and captioning) accompanies each step of the dissection.

Then, take the Final Test with test parameters set by the teacher. Test results are sent to a printer for teacher or student use.

With all DryLab Plus programs you receive complete documentation including instructions for using the software and for customizing its features to meet your needs.

DryLab Plus Worm is also fully editable. Each program utilizes DryLab Plus' powerful software 'engine' so you can:

- Alter the material to suit the level of students or create multiple versions for different grade levels.
- Add, eliminate or edit materials (movies, pictures, text, sounds, questions, answers).
- Add-to, eliminate or edit the glossary.
- Randomly create on-line tests (a different one for every class or every student).
- Create multiple versions of printed tests of questions you select.
- Create printed tests using pictures and highlighted objects you select.
- Track your students' progress (how long were they in the program? Did they access Teacher's Notes? Did they use the glossary?, etc.)
- Design your own program with your own pictures, videos, sounds, text and questions.
- Print images or transfer them to a word processor or paint program for further manipulation.

### How Do You Benefit From DryLab Plus?

- Provides a lab experience for students who miss the wet lab.
- Provides a different test for students who miss the exam.
- Can be used as a pre-lab preparation, post-lab review or a pre-exam study tool in conjunction with the hands-on wet lab.
- Simple interface and complete database of questions make this product a fantastic tool right out of the box!
- Offers teachers total flexibility over the program so they can design the program to meet their teaching needs.
- Provides an alternative lab experience for conscientious objectors.

DryLab Plus makes learning fun; go head to head with a friend or a group of friends in a QUIZ. Get 95% or better and get on the Learning Heroes list of top scorers displayed for all time on the opening screen!
