

# DryLabPlus Perch

*An expert dissection thoroughly investigates the external and internal anatomy of the perch.*

## *Product Features*

Stunning Full Screen Photographs at High-Resolution	Complete Interactive Dissection Video
Anatomical Structures Identified by Text, Sound, and Outlines	Movie Clips of Special Anatomical Features and Techniques
Teacher Editable Content	Electronic Teacher and Student Notepads

## *Grade Level*

**High School • College • University**

## *Detailed Product Information:*

More than 50 high-resolution images and outstanding videos offer your students a comprehensive look at the external and internal features of this bony fish. Learn about such things as mobility, buoyancy, and protection as students make their way through the 15-step dissection. Approximately 200 questions will test your students understanding.

Navigate the program using a drop-down menu to choose various views of a specimen. Anatomical features are highlighted and identified using a mouse. Each picture is accompanied by Teacher's Notes, providing important information about each view. Full-motion videos provide detailed insight into often difficult to show concepts or topics. Test your knowledge as identify objects and answer random questions generated by the computer.

Once you have mastered the anatomical features, move on to performing the dissection. You must choose the correct dissection instrument for each step and must perform all of the steps necessary in proper sequence. On-line help and a full-motion video (with narration and captioning) accompanies each step of the dissection.

Then, take the final test with test parameters set by the teacher. Test results are sent to a printer for teacher or student use.

With all DryLab Plus programs you receive complete documentation including instructions for using the software and for customizing its features to meet your needs.

DryLabPlus Perch is fully editable, utilizing DryLab Plus' powerful software engine so you can:

- Alter the material to suit the level of students or create multiple versions for different grade levels.
- Add, eliminate, or edit materials (movies, pictures, text, sounds, questions, answers).
- Add-to, eliminate, or edit the glossary.
- Randomly create on-line tests (a different one for every class or every student). You set the parameters!
- Create multiple versions of printed tests of questions you select.
- Create printed tests using pictures and highlighted objects you select.
- Track your students' progress (how long were they in the program? Did they access Teacher's Notes? Did they use the glossary?, etc.).
- Design your own program with your own pictures, videos, sounds, text, and questions.
- Print images or transfer them to a word processor or paint program for further manipulation.

### How Do You Benefit From DryLab Plus?

- Provides a lab experience for students who miss the wet lab.
- Provides a different test for students who miss the exam.
- Can be used as a pre-lab preparation, post-lab review, or a pre-exam study tool in conjunction with the hands-on wet lab.
- Simple interface and complete database of questions make this product a fantastic tool right out of the box!
- Offers teachers total flexibility over the program so they can design the program to meet their teaching needs.
- Provides an alternative lab experience for conscientious objectors.

DryLab Plus makes learning fun; go head to head with a friend or a group of friends in a quiz. Get 95% or better and get on the Learning Heroes list of top scorers displayed for all time on the opening screen!
